

# GIT

→ boiler\_plate git(main) git push -u origin main  
remote: Permission to voiciJules/boilerplate.git denied to voicihojun.  
fatal: unable to access 'https://github.com/voiciJules/boilerplate.git/': The requested URL returned error: 403

macOS 키 집합에서 자격증명 업데이트

```
# git credential-osxkeychain erase
host=github.com
protocol=https
```

Instead of committing all of the changes you've made since the last commit, the stage lets you group related changes into highly focused snapshots before actually committing it to the project history
