

Download Node JS and Express JS

Node.js is an open source, cross-platform, js runtime environment that executes JS code outside of a browser. We can use JS in the serverside thanks to Node.js

Node.JS

Express.JS

Express.js is a web application framework for Node.js, it makes us easy to make a website or an app.

Download Node.JS

node -v

npm init

package.json

index.js

starting point of back end

Download express.js

npm install express --save

node_modules

this folder contains downloaded dependencies

make a basic express.js app

<https://expressjs.com/en/starter/hello-world.html>

"start" : "node index.js"
in the 'scripts' of package.json

npm run start

lsof -i :port
kill -9 PID
